

RCS recycled TPE and recycled plastic 4-in-1 cable

SKU: TP1P302.48

Categorie: Tehnologie

Versatile 4-in-1 charging cable designed for everyday convenience and reliable performance. Featuring both USB-C and Lightning outputs, the cable supports a wide range of devices in one compact solution. Built with 100% recycled copper coils, it ensures stable and safe charging for all your devices. Supporting up to 60W PD charging, it is suitable for fast charging laptops, tablets, and mobile devices. The cable also supports data transfer and is compatible with Apple CarPlay and Android Auto for seamless connectivity on the go. The integrated protective PCBA provides additional safety against high currents and voltages, offering better protection for both the user and connected devices. The durable 120 cm cable is designed for comfortable everyday use whether at home, at work, or on the go. Made with RCS (Recycled Claim Standard) certified recycled ABS, recycled TPE and recycled copper, the total recycled content is 57% based on the total item weight. FSC packaging.
