

Genomic tracks for chromosome 10p11.21, showing a gene model, a recombination rate plot, and a recombination rate heatmap. The gene model shows the location of the PLAGL1 gene. The recombination rate plot shows the recombination rate (cM/Mb) across the region. The recombination rate heatmap shows the recombination rate (cM/Mb) across the region for different populations.

Gene Model: PLAGL1

Recombination Rate (cM/Mb): 0.000000 to 0.000000

Recombination Rate Heatmap: 0.000000 to 0.000000
