02_

**HIGH
VISIBILITY**

EUROPEAN STANDARDS_

EN 17353 **ENHANCED VISIBILITY EQUIPMENT FOR MEDIUM RISK SITUATIONS**

EN 17353 specifies the requirements applicable to clothing and accessories with increased visibility for situations of medium risk.

Increased visibility clothing and accessories are intended to offer visibility to the wearer in medium risk situations in any daylight conditions and/or under the illumination of vehicle headlights or spotlights in the dark.

EN ISO 20471 **HIGH VISIBILITY CLOTHING**

The high-visibility clothing is intended to provide conspicuity of the wearer in any light condition when viewed by operators of vehicles or other mechanized during daylight conditions and under illumination of headlights in the dark. The use of a high-visibility piece of garment does not guarantee full visibility of the user under all conditions. High-visibility clothing is divided in three classes, depending on the minimum surfaces of visible material.

CLASS 1: They are used in activities that allow the wearer to be viewed completely without hesitance from approaching vehicles. There should be enough distance between the worker and the traffic, which should not travel at more than 40 km/h.

CLASS 2: Their use is applied to situations where a greater visibility is needed, under bad weather conditions or situations where the workers carry out tasks that could distract their attention from the approaching traffic or situate them close to vehicles travelling at more than 40 km/h.

CLASS 3: They are used by those workers who are exposed to a great danger in high work load situations, bad weather conditions or speed traffic of more than 80 km/h.

EN ISO 13688 GENERAL REQUIREMENTS

Protective clothing replaces or covers personal clothing and is designed to provide protection against one or more hazards. This standard regulates the general requirements of ergonomics, safety, size designation, aging, compatibility and marking of protective clothing and the information that the manufacturer has to provide with the clothing.

EN 343 PROTECTION AGAINST RAIN

The European standard EN 343 specifies the requirements and test methods applicable to the materials used and to the seams made to make protective clothing against rainfall in the form of rain, snow, fog and soil moisture with temperatures up to -5°C . The standard, in addition to the criteria suitable for defining excellent waterproofing, defines the comfort criteria of the garment that will be intended for both work and leisure.

EN 14058 GARMENTS FOR PROTECTIONS AGAINST COOL ENVIROMENTS

EN 14058 specifies the requirements and test methods for the performance of garments for the protection of the body against the effects of cold environments with temperatures above -5°C . These effects include not only low air temperatures, but also humidity and air velocity.

NEW PRODUCT

This item is a new addition to this catalogue.

NEW COLOUR

This icon indicates that the article is presented in a new colour in this catalogue.

NEW SIZE

Item with a new size in this catalogue. Indicates also which item it is.

BREATHABLE TECHNICAL FABRIC

Fabrics with breathability and comfort features specific for sports activities.

STRECH FABRIC

Fabric with elastane.

WATERPROOF

Fabric prepared to repel water, preventing it from trespassing to the garment.

WATER RESISTANT

Special treatment that minimizes the erosive effect of water on the fabric of the garment.

WINDPROOF

Fabric treatment that prevents the wind trespassing to the garment.

ADHESIVE LABEL

Vinyl label that can stick and peel off easily during the marking process.

REMOVABLE LABEL

This label can be removed without unpicking the covered seams.

UNISEX

Model suitable for both men and women.

DUO CONCEPT

This article has its equivalent for the other gender.

REVERSIBLE

Reversible garment.

OPTIONAL POCKET

Includes an optional pocket to be added in the garment.

HI-VIZ

Model with high-visibility properties that complies with EN 20471.

NIGHT VISIBILITY

Model with visibility properties that complies with EN 17353.

EN ISO 11611

Protection for use in welding

EN ISO 11612
